

## ABOUT STYLUS

The majority of stylus produced today are manufactured from synthetic sapphire though diamond stylus are being used in increasing numbers particularly on high fidelity pick-ups. Unfortunately, due to misleading advertising in the past, a completely wrong impression has been created that sapphire stylus were everlasting. In fact the use of expressions such as semi-permanent etc., have helped to create that myth. Fortunately no such claims are made today not even as regards diamond stylus for it is generally realised that neither sapphire or diamond stylus are everlasting and that a worn stylus will result in permanent damage to the record.

It should be fully understood that sapphire stylus have only an approximate life of 50 hours playing time on the average whereas diamond stylus being the hardest known material has a life approximately 25 times that of sapphire—1,250 hours. Both diamond and sapphire stylus are manufactured to very high standards of precision and it is not the basic cost of the raw material itself which accounts for the considerable difference in price between the two, but due to the fact that the diamond is shaped and polished by diamond dust which is a lengthy and costly process. It will be seen when comparing the relative costs that the diamond is the obvious choice when it comes to replacing a stylus in spite of the fact that the initial outlay is greater. It should not be assumed that the diamond stylus is only suitable for use with high fidelity pick-ups but should also be advocated for use with the average radiogram and record player.

Whether using a sapphire or a diamond great attention must be paid to the question of wear, as replacement at the right time is of vital importance and the approximate estimations of average life given earlier in this article will serve as a reliable guide. The only positive check of its condition however is by examination through a microscope preferably with a magnification of at least one hundred times. A professional microscope is ideal but often very expensive and it is perhaps as well to mention at this stage the Philips stylus tester and Goldring stylus microscope which are mentioned later in this book and with which any type of stylus may be inspected. With this facility available it is then possible to examine the stylus for flats

on either side of the stylus tip and in the case of the dealer to produce positive proof to the customer as to the actual condition of the stylus. The stylus must be changed immediately the slightest flat is apparent as continued use beyond this point will accelerate stylus wear and inevitably cause damage to the record.

This damage to the record will present itself in two ways. Firstly, due to the sharp edges formed on the stylus tip it will be impossible for the stylus to correctly trace the modulations in the groove particularly at high frequencies where there are sudden changes in the direction of the modulation. Secondly, increased surface noise will be noticeable, due mainly to the minute record particles actually cut from the groove. This of course limits the reproduction of the top frequencies now available from an L.P. record to something in the region of 9,000 c/s. It is obvious therefore that a worn stylus is about as kind to records as a cold chisel.

The dimensions of a stylus tip is so designed that its radius fits the record groove approximately midway between top and bottom. To do this correctly the tip radius has to be near enough the three thousandths of an inch for 78 r.p.m. Records—one thousandth of an inch for L.P. records and half-thou' for Stereo records. Many manufacturers are however using the compatible size tip radius of three-quarter-thou' for both L.P. monaural and Stereo records and claim no increase in record wear. The stylus pressure of the pick-up is also an influencing factor in record wear and close attention must be paid to manufacturers recommended playing weights. This varies considerably according to the type of pick-up and stylus tip radius used. Three very useful devices are now available for checking stylus pressure; the Goldring Pressure Balance, Garrard Pressure Gauge, and Acos Pressure Gauge which are mentioned later in the book.

Dust in the grooves of records is another major factor in record wear and it cannot be emphasized too much that care of records will be handsomely rewarded. Due to the build up of an electrostatic charge, particularly on L.P. records this creates a tendency to attract dust and the use of one of the proprietary brands of "anti-static" cleaning fluids or cleaning pads is to be highly recommended. A very useful device is the "Dust Bug" which is now in very widespread use.

ACOS GP29/2

For Standard and L.P. Records. Black Moulding. (Replaces old GP25). Used by Garrard, Collaro B.S.R. and Decca. Cartridge is now obsolete and **NO LONGER AVAILABLE**. Replacement styli are however still obtainable. Suitable replacement cartridge GP67-2.

ACOS GP29

For Standard and L.P. Records. Black Moulding. Very similar to GP29/2 which supercedes this type but owing to metal side plates it is essential in many cases to use this cartridge for replacement purposes. Used by Garrard, Collaro, B.S.R. and Decca. Cartridge is now obsolete and **NO LONGER AVAILABLE**. Replacement styli are however still available.

No substitute cartridge available.

ACOS HGP33-1

For Standard and L.P. Records. Brown Moulding. Used by B.S.R. and Garrard. Cartridge is now obsolete and **NO LONGER AVAILABLE**. Replacement styli are however still available.

Use GP67-2 Cartridge in lieu.

ACOS  
HGP35-1 STD.

Plug-in type heads for either Standard or L.P. records. Fits only pick-up arm as used on Garrard RC75M, RC80M, RC90, RC111, RC121 autochange units and Type T.A. and 4SPA unit. Crystal unit identical to HGP39-1. Heads now obsolete and **NO LONGER AVAILABLE**. A suitable replacement is Garrard MPM2 Crystal Head.

ACOS  
HGP35-1 L.P.

ACOS HGP37-1

For Standard and L.P. Records. Brown Moulding. Used by B.S.R., Garrard, H.M.V. and Marconi. Now obsolete and **NO LONGER AVAILABLE**. Recommended replacement GP67-2. Replacement rubber dampers per doz. Replacement styli still available.

ACOS  
HGP37-1  
COLLARO

Turnover type Head. Can be used on Collaro 3/RC532, AC3/534 etc. Incorporates HGP37-1 Cartridge detailed on page 3. Earlier versions of this head may have used HGP33-1 Cartridge also detailed on page 3. Head **NO LONGER AVAILABLE**. Suitable replacement cartridges can still be obtained.

ACOS HGP37-1 GARRARD

Turnover type Head. Can be used on Garrard RC80M, RC90, RC111 and T.A. unit. Incorporates HGP37-1 Cartridge detailed on page 3. Earlier versions of this head may have used HGP33-1 also detailed on page 3. This Head is now obsolete but suitable replacement is Garrard MPM2/Crystal.

ACOS HGP39-1 STD.  
ACOS HGP39-1 L.P.

Slide on type Pick-up Head available separately for Standard or L.P. Records. Used on Acos GP20 Pick-up. This type superceded old type GPI9 Heads. With the use of appropriate adaptor can be used on Decca or Garrard units—See section on Adaptors page 59.  
N.R.—HGP39-1 Standard and L.P. Heads are now obsolete and **NO LONGER AVAILABLE**. They are replaced by HGP39-3 as detailed below. The HGP39-3 is in fact the head used in the Black Shadow Pick-up and has an improved performance on HGP39-1.

ACOS HGP39-3 BLACK SHADOW  
HEAD

This Pick-up Head is identical in appearance to HGP39-1 which it now supercedes and is specially designed for use with the Black Shadow arm.

Tracking weight 4-6 grams. Average output 100mV. Frequency response approximately flat to 18 Kc/s.

It uses the same type stylus as the earlier model:—SB1-SB2 Available separately for Standard and L.P. Records.

## ACOS GP59-3

## ACOS GP59-5

Plug-in type Heads available separately for either L.P. or Standard Records. Fits Collaro units RCS32, AC534, 3RCS32, AC3/534 etc. In Cream or Walnut. The crystal unit incorporated is identical to HGP39-1. As above but shorter moulding in Walnut only. Can be used on 3RC511, 3RC531, AC3/511, AC3/531, 3RC521. This Head is now obsolete and **NO LONGER AVAILABLE**. Replacement stylus can be obtained.

Plug-in type Heads available separately for either L.P. or Standard Records. Fits Garrard RC80, RC72, RC72A, RC75 and Model M unit. The crystal unit incorporated is identical to HGP39-1. This Head now obsolete and **NO LONGER AVAILABLE**. Suitable substitute Garrard MPM1/Crystal.

This Cartridge has been manufactured in three separate versions. The GP59-1 being designed for High Gain Amplifiers. GP59-3 a medium output type and GP59-5 high output for low gain amplifiers. Earliest versions of GP59-1 and GP59-3 had no identifying marking but later versions of all these types have type number embossed in the moulding. For Standard and L.P. Records. Used by B.S.R. and Garrard Stylus are easily replaced but care should be taken to ensure that the stylus flaps or "ears" are fitting over the drive reed. Stylus shaft phosphor bronze. All GP59/Series are now obsolete and **NO LONGER AVAILABLE**. Messrs. ACOS recommend GP67-1 or GP67-2 in lieu. Stylus still obtainable.

Spare rubber dampings per doz. 3/- 6d.

ACOS HGP55-1 STD.  
ACOS HGP55-1 L.P.

Available separately for Standard or L.P. Records. This Head incorporates same crystal as HGP39-1, but has three-pin fitting to enable this to be used on B.J. arm, Decca units and Garrard.

Head now obsolete and **NO LONGER AVAILABLE**. No substitute can be recommended.

Stylus however still obtainable.

ACOS GP61-1

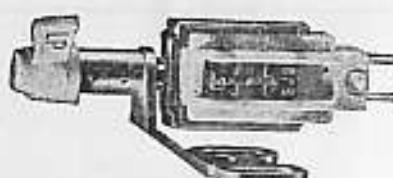

For Standard and L.P. Records. This is a ceramic cartridge for use in tropical climates and has been seldom used in this country. Stylus shaft aluminium alloy, otherwise identical in appearance to SK1 stylus. Cartridge now obsolete and **NO LONGER AVAILABLE**. Styli still obtainable.

ACOS HGP63-1

Turnover type pick-up head. This is the long moulding which enables this to be fitted to Garrard RC72, RC72A, RC75A, RC80 and Model M unit. The Crystal cartridge incorporated is the HGP37-1. See page 3.

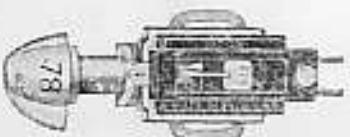

Head now obsolete and **NO LONGER AVAILABLE**. A suitable replacement for this is the Garrard MPMI Crystal head.

ACOS GP65-1G, GP65-3G

These Cartridges are one of the most recent introductions to the Acos range and are to be found on very many Radiograms and Record Players. Colour of Cartridge case, Cream. GP65-1 is a medium output type and GP65-3 a high output type.

Cartridge now obsolete and **NO LONGER AVAILABLE**. Recommended replacement GP67-1 or GP67-2 High output.

ACOS GP67-1, GP67-2

GP67-1 Monaural Crystal cartridge of medium output with frequency response to 14 Kc/s. Sensitivity 160 mV. at 1cm/sec. Recommended input impedance 2MΩ. Stylus pressure 5-7 grams. GP67-2 A high output type for one valve amplifiers. Sensitivity 50 mV. at 1 cm/sec. Response 30-8,000 c/s. Stylus pressure 8-10 grams.

Two knobs are normally supplied; the half skirted type is used when bracket is not required as in one-piece arms.

B.S.R. TC4 &amp; TC4A (See notes)

For Standard and L.P. Records. Replaces old types TC2 and TC3. Its use by B.S.R. has now been DISCONTINUED and for Monarch autochange unit type GP67-2 and TC8M Cartridge pages 9 and 17, are recommended. For the GU4A Regent unit however, none but the TC4 will fit and to take care of this, a modified type TC4A has been produced.

22/6 3/8

This consists of TC8M Cartridge with modified bracket which is fixed into the GU4A pick-up arm by means of a leaf spring. Therefore for GU4A 3 speed non-auto unit only, ask for TC4A Cartridge.

B.S.R. TC8H

The TC8H High Output "Ful-Fi" Cartridge is very similar in appearance to TC8M but can be identified from its colour. Early cartridges cream, later types orange. It is designed for use with Low Gain Amplifiers and all inexpensive record players. Both Cartridges will fit all usual arms American and European having standard  $\frac{1}{2}$ " fixing centres, single centre hole mounting.

Sensitivity 800 mV./cm./sec. load 2M  $\Omega$  200 p.f. Stylus pressure 7-10 grams.

A. TC8H/2 cartridge Black in colour was once produced but was withdrawn from production due to poor compliance. Use TC8H as replacement.

22/6 3/8

B.S.R. TC8M

The TC8M Moderate Output "Ful-Fi" Cartridge is a High Fidelity Cartridge designed for use with Moderate and High Fidelity Amplifiers. Can be identified by colour of moulding which is Light Brown. A unique feature is simplicity of replacing Sapphire Stylus.

22/6 3/8

Sensitivity 335 mV./cm./sec. Load 2M  $\Omega$  200 p.f. Stylus pressure 6-9 grams.

## B.S.R. TC8H/PU30 CARTRIDGE

The cartridge used in PU30 Pick-up arm—fitted to B.S.R., TU12 and GU7 unit does not have a turnover cradle but is fitted through front hole in pick-up arm. Only identical fitting cartridge can be used. The actual cartridge itself is however identical as regards characteristics as TC8H or M or TC8S Stereo as the case may be. For reordering purposes quote as follows.

TC8M/PU30 22/6 3/8

TC8H/PU30 22/6 3/8

TC8S/PU30 34/- 5/6

PU30 Mo. Replacement bracket and knob—Mono 9d. 2d.

PU30 St. Replacement bracket and knob—Stereo 9d. 2d.

## B.S.R. TC12H

A high output Monoaural Crystal Cartridge for Standard and Microgroove records. Output 1.3 V./cm./sec. Load 1MΩ 100 p.f. Stylus pressure 7-10 grams.

NOW WITHDRAWN.

Use TC8H as replacement.  
Styli are still available.

## B.S.R. TC12M

A medium output monoaural Crystal Cartridge for Standard and microgroove records. Output 0.5 V./cm./sec. Load 1MΩ 100 p.f. Stylus pressure 7-10 grams.

NOW WITHDRAWN.

Use TC8M as replacement.  
Styli are still available.

**COLLARO  
HIGH FIDELITY INSERT**

This High Fidelity Magnetic pick-up insert is an identical replacement for the one used in Collaro RC500 changers which did not have detachable heads. This insert was also used for High Fidelity Magnetic head detailed page 23.

Heads and insert now obsolete and **NO LONGER AVAILABLE**.

**COLLARO ORTHODYNAMIC**

For Standard and L.P. Records. This is a Low Impedance Magnetic Cartridge, for use with Transformer.

Cartridge now obsolete and **NO LONGER AVAILABLE**.

A suitable substitute would be Studio O head as detailed on page 27 with necessary matching.

**COLLARO ORTHODYNAMIC  
HEAD**

This is a dual purpose head for Standard and L.P. Records and has twin point alloy tipped stylus assembly incorporated low impedance orthodynamic magnetic cartridge detailed above and is for use with low impedance transformer. This head has been made in two lengths, type A moulding the shorter, type B the longer one. Illustration shows type B. For use on Collaro arms only. Head and Cartridge obsolete and **NO LONGER AVAILABLE**. Studio O Pick-up head could be used in lieu with necessary alteration to pick-up input.

**COLLARO GP27**

Plug-in type Head available separately for Standard or L.P. Records. Incorporates Acos, GP27 Cartridge. Green Spot Standard, Red Spot Microgroove Purple Spot Dual Purpose.

Head and replacement cartridges now obsolete and **NO LONGER AVAILABLE**.

COLLARO 'STUDIO' HEAD

This is a turnover type head for Standard and L.P. Records. 'Studio' crystal cartridge incorporated but this could be either, 'O', 'P', 'T' or Transcription. This will be easily identified from inscription on side of cartridge.

Pick-up head mouldings only. 5/- 10d.

COLLARO STUDIO  
ORIGINAL SERIES

For Standard and L.P. Records. Four different types have been marketed. Re-order according to inscription on cartridge. This will be either Studio O, Studio P, Studio T or Transcription.

These cartridges which use stylus of the screw fixing type are now obsolete and **NO LONGER AVAILABLE**. They are superseded by RONETTE types detailed on pages 91/93 using clip-in stylus. Electrically identical but frequency response improved. Replacement stylus are however still available.

Stylus for types 'O' and 'P' cartridge have phosphor bronze shaft.

Stylus for Transcription Cartridge have aluminium shaft the L.P. one having a series of holes drilled down middle of shaft.

Needle screws for Studio Cartridge. 1d.

Plastic turnover knobs. 6d. 1d.

Solder tags for connection to terminals (per doz.). 6d. 1d.

COLLARO TYPE 0S CRYSTAL  
CARTRIDGE 5399

A Turnover Cartridge used on some Collaro Record Players and Changers. Cartridge case, Cream in colour and incorporates easily replaceable push-in Stylus. Identification plate on side of Cartridge clearly marked 'Studio 560S'. Not to be confused with 'O', 'P', 'T' series. Sensitivity 200 mV. at 1 cm/sec. Load 1M $\Omega$ . Frequency response 50-10,000 c/s. Stylus pressure 7-9 grams. Cartridge obsolete and **NO LONGER AVAILABLE**. Use Ronette DC2840V. Detailed on page 91. Stylus however are still available.

E.R. 58 CRYSTAL CARTRIDGE

A high output Crystal Cartridge with good frequency response and low distortion content.  
**NO LONGER AVAILABLE** but a suitable replacement would be Ronette DC284-OV.

E.R. 60 STEREO CARTRIDGE

A Ceramic Stereo Cartridge with turnunder Stylus assembly suitable for Monaural, L.P. and Standard records also. Output 110 mV./cm./sec. Load 1MΩ 100 p.f. Stylus pressure 5-6 grams. Frequency response 40-12 Kc/s. Separation better than 15 db.

35/- 5/7

E.R. 701/702 CARTRIDGE

The 701 is a high output Crystal and 702 a medium output Crystal Cartridge for Monaural records. Both identical in appearance and use same replacement stylus assembly. Stylus pressure 8 grams. Load 1MΩ 100 p.f. Output 701 900mV./cm./sec. Response 100-7 Kc/s. Output 702 700 mV./cm./sec. Response 100-10 Kc/s.

This cartridge has been superseded by ER5MXD.  
Stylus still obtainable.

ELAC KST9  
PERPETUUM EBNER  
PE10 and PE1B

PE10 is a Crystal Monaural Cartridge the PE1B being similar but of ceramic type. Type PE10 replaces PE5 and PE8 which are now obsolete. Type PE10 output 180 mV./cm./sec. Load 1MΩ. Frequency response 20-14,000 c/s.

GARRARD TYPE A BAYONET  
FITTING MAGNETIC HEAD

The original Magnetic Pick-up Head used on all Garrard Record Changers and Single Records Players, up to the year 1945. Various resistances were used, these being identified from the colour of the band surrounding the Coil.

Brown Band — 8,000 Ω  
Red Band — 6,000 Ω  
Black Band — 2,000 Ω  
Dark Green Band — 700 Ω  
Orange Band — Humbucking  
Coil

Special Coils have also been used and full details of these can be obtained from Garrard Service Dept.

This Head is now obsolete and  
NO LONGER AVAILABLE.

GARRARD TYPE B BAYONET  
FITTING MAGNETIC HEAD

This Pick-up Head has similar characteristics to the Type A mentioned above, but the shank is longer and the slot therein moved 45° to make the Pick-up Head fit the shorter Pick-up Arm, originally introduced to take the Crystal Pick-up Head which incorporated S8 Rothermel Cartridge. This Head is now obsolete and NO LONGER AVAILABLE.

GARRARD S8 CRYSTAL HEAD

This is the original Crystal Pick-up Head used on all Garrard Record Changers and Single Record Players having a special metal Pick-up Arm, up to the year 1945. Rothermel and BTB Cartridges have been used in this Head but are NO LONGER AVAILABLE.

GARRARD TYPE E PICK-UP  
INSERT

This insert was used in the RC10 Record Changer and in the Types E and F Single Record Players having plastic Pick-up Arms, up to the year 1945, then later in the Type S Single Player. Colour codes for Coil resistances are the same as for the original Type A Magnetic Head. Now obsolete and NO LONGER AVAILABLE.

**GARRARD TURNOVER HEAD  
MOULDING TYPE MPM1**

A turnover Pick-up Head for Standard and L.P. Records. This particular head moulding MPM1, which is the long type, is designed to fit the arm used on RC72, RC72A, RC75, RC80 and Model M unit. Will also fit Garrard pick-up arm assembly type PA2. This moulding has been supplied in the past with a wide variety of Crystal or Magnetic cartridges. For these replacements actual type numbers can be identified from illustrations in other sections. If a complete head is required, you would order "MPM1 Crystal Head" or "MPM1 Magnetic Head" according to choice.

Garrard Turnover head moulding only type MPM1.	6/3	1/-
Garrard MPM1 crystal head complete.	23/9	4/-
Garrard MPM1 magnetic head complete. Obsolete and NO LONGER AVAILABLE.		

**GARRARD TURNOVER HEAD  
MOULDING TYPE MPM2**

A turnover Pick-up Head for Standard and L.P. Records. This particular head moulding MPM2, which is the short length head, is designed for use with RC75M, RC80M, RC88, RC90, RC98, RC111, RC121, auto change units and 4SPA and "TA" unit. Will also fit Garrard pick-up arm assembly type PA4. Could incorporate a variety of cartridges. Refer to other sections for replacement type number of these. Owing to the introduction of Stereo, this head is now being supplied wired for Stereo.

If a complete head is required, you would order "MPM2 Crystal Head", "MPM2 Magnetic Head" or "MPM2 Stereo Head".

GARRARD GCS10 STEREO  
CRYSTAL CARTRIDGE  
AND GCS10/1, GCS10/2

A medium output Crystal Cartridge using a single stylus coupled to a pair of elements in such a way as to ensure adequate separation. Will fit into any Garrard pick-up head moulding. Stylus radius is compatible size enabling this cartridge to be used on L.P. Monaural Records. Output: GCS10/1 200mV, GCS10/2 140mV.

Stylus supplied complete with carrier.

Stylus Carriers each 1/3 2d.

Cartridge connecting tags per doz. 8d. 1d.

N.B. A later version GCS10/1 is identical as regards the Cartridge itself but employs a modified Stylus Carrier which is shorter in length than the original, and a Stylus Shank which is correspondingly longer. To take care of this all Garrard stylus will in future be supplied complete with carrier.

Both cartridges now obsolete and NO LONGER AVAILABLE. Most cartridges of similar output would serve as replacement. Stylus are however still available.

GARRARD GCE12 STEREO  
CARTRIDGE

A Turnover type Ceramic Cartridge for Monaural and Stereo records. Average sensitivity Monaural, L.P. and Stereo 150mV/cm./sec. Load 1MΩ 100 p.f. Stylus pressure 7 grams. Will fit all Garrard mouldings and most other pick-up heads.

Cartridge now obsolete and NO LONGER AVAILABLE. Nearest equivalent EV26. Stylus are still available.

GARRARD EV26 STEREO  
CARTRIDGE

A Turnover type Ceramic Cartridge for Monaural and Stereo records with adequate output, smooth response and high compliance. Sensitivity 110 mV/cm./sec. average. Load 1MΩ. Stylus pressure 7.8 grams.

RELUCTANCE CARTRIDGE 500

For Standard and L.P. Records. A High Fidelity Magnetic Cartridge. Will fit all Pick-up Heads having  $\frac{1}{2}$ " fixing centres for cartridge bracket.

Type 500 (2 Sapphires) — —

Type 500 SD (1 Sapphire Standard-Diamond microgroove) — —

Type 500 MSD (Sapphire Standard-Diamond microgroove) with Mu-Metal Shell. — —

Cartridge now obsolete and  
**NO LONGER AVAILABLE.**  
This is superseded by 580 cartridge. Stylus are still obtainable.

GOLDRING 580 VARIABLE  
RELUCTANCE CARTRIDGE

A high quality variable reluctance Cartridge almost approaching 600 type in performance but fitted with two sapphire stylus. Complete with mu-metal screen. Can be identified from 600 cartridge by finish of mu-metal screen which is dull bronze.

84/- 13/8

Output 3-2 mV/cm/sec. Load 68K  $\Omega$ . Frequency response 20-18,000 c/s. Tracking weight 7 grams.

GOLDRING VARIABLE  
RELUCTANCE CARTRIDGE 600

Similar to 580 Cartridge but designed specifically around a Diamond L.P. Stylus. A High Fidelity cartridge with flat frequency response from 20 to 20,000 c/s. Sapphire 78 r.p.m. and Diamond L.P. fitted as standard.

168/- 27/4

Can be distinguished from 580 by its gold plated finish.

Output 3-2 mV/cm/sec. Load 68K  $\Omega$ . Frequency response 20-21,000 c/s. Tracking weight 7 grams.

GOLDRING MAGNETIC STEREO  
CARTRIDGE 700

This is a 4-pole balanced armature Magnetic Cartridge for quality reproduction of Stereo Records. Fitted with  $\frac{1}{2}$  thou' Diamond Stylus and designed to track as low as three grams. Separation of 20dB. Standard  $\frac{1}{2}$ " fixing centres suitable for mounting in all types of pick-up arm.

— —

Obsolete and **NO LONGER AVAILABLE.** But stylus are still obtainable. Replaced by type 700 MK. II detailed on page 73.

**R.C.A. 85640 VARIABLE  
RELUCTANCE ORTHOPHONIC  
CARTRIDGE**

This High Fidelity 8 pole Variable Reluctance Cartridge is fitted to all Pick-ups in the new Orthophonic Range. Movement completely sealed in clear plastic encapsulation. Very simple method of Stylus change. Many variations of Stylus are available both single and dual as per full details on opposite page. Price of Cartridge is less Stylus.

Production of this cartridge has now been discontinued but limited stocks of stylus are available with exception of 85642 and 85655.

**RONETTE BINOFLUID BF-40**

A single-sided crystal cartridge, also suitable for the reproduction of Monaural L.P. records. Excellent frequency response. Sensitivity 180 mV/cm./sec. Load 1MΩ 100 p.f. Stylus pressure 5-7 grams. Frequency response 30-12,000 c/s.

50/- 7/11

**RONETTE DC-284-OV  
(COLLARO STUDIO 'O')**

Monaural Crystal Cartridge of Turnover type for Standard and L.P. records. Designed for use with average amplifier or radio receiver. Sensitivity 230mV/cm./sec. Load 1MΩ 100 p.f. Stylus pressure 6-10 grams. Frequency response 30-10,000 c/s. Extensively used by Collaro. Stylus easily replaceable—clip-on variety.

Obsolete and NO LONGER AVAILABLE.

GARRARD TYPE A ADAPTOR 47993

Will fit the Pick-up Arm on the Model RC72, RC72A, RC75A and RC80 Record Changers and the Model M Radiogram Unit, to take the range of Garrard and Decca Plug-in Pick-up heads.

Obsolete and NO LONGER AVAILABLE. Use MPM1 head in lieu.

GARRARD TYPE B ADAPTOR 48893

To fit the Garrard Model RC72, RC72A, RC75A, and RC80 Record Changers and the Model M Radiogram Unit to take the Acos Type GP19, HGP39 Crystal Pick-up Heads.

NO LONGER AVAILABLE. Use MPM1 head in lieu.

GARRARD TYPE C ADAPTOR

To fit certain B.S.R. units used by Decca, the Garrard TB unit and also to convert the BJ Arm to take Acos slide-on heads HGP39 or old type GP19 head.

Obsolete and NO LONGER AVAILABLE. No recommended replacement.

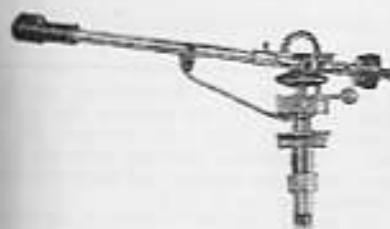

DECCA TO ACOS ADAPTOR

## PICK-UPS COMPLETE AND PICK-UP ARMS

ACOS "BLACK SHADOW" PICK-UP

93/2 14/10  
Frods directly into the magnetic pick-up input of any amplifier. Supplied complete with HGP39-3 Microgroove head with diamond stylus and Selector box. Pick-up arm only allowing for either type of HGP39-3 head to be fitted. See page 5. 21/8 3/5

ACOS HI-LIGHT STEREO PICK-UP

The "Black Shadow" is a new concept in crystal pick-up design. Two outputs give universal matching to any amplifier. One utilizes the inherent recording equalisation of the crystal, to give a response approximately flat to 18 kc/s. without further correction. The other has a velocity characteristic which

records directly into the magnetic pick-up input of any amplifier. Supplied complete with HGP39-3 Microgroove head with diamond stylus and Selector box. Pick-up arm only allowing for either type of HGP39-3 head to be fitted. See page 5. 21/8 3/5

The 'Hi-Light' Pick-up has been designed to play records at downward pressure with the elastic limit of the disc material. No permanent deformation of the record takes place under these conditions and record wear is not measurable.

The requirements for a Cartridge to fulfil such conditions are most stringent. A very low effective tip mass is required, coupled with a high compliance. With one head Stereo or L.P.

Additional Heads Sapphire 31/- 5/-  
Additional Head Diamond 46/6 7/6

B.J. TAN II PICK-UP ARM  
B.J. COUNTER WEIGHT UNIT  
For above Pick-up

This Arm is claimed to achieve perfect tracking. By following the tangent of groove exactly, it preserves records, extends frequency response and offers many other advantages. Decca XMS or type H can be used or, with the addition of the B.J. adaptor, the Acos HGP39 head can be used. The special B.J. head can be used without adaptor. All later models supplied wired and ready for Stereo use. Attached to B.J. Arm with or without standard weights produces a total point pressure variation of approximately 4 grams.

63/- 10/-

12/- 1/11

B.J. SUPER 90 ARM

The B.J. Super 90 is the new DE-LUXE edition of the world famous B.J. Arm which since its introduction as the first pick-up arm to overcome TRACKING ERROR, has made the word TANGENTIALITY another way of saying HI-FIDELITY. Supplied with two plug-in shells which will suit over 15 popular heads, arm clip, spare weights and mounting template. Suitable for all records up to 16". Height variable by more than 1" to adjust for different turntables. All later models wired and ready for Stereo use.

**DECCA MK. I SUPER PICK-UP ARM**

This arm supersedes original Mk. I arm and is specially designed for a playing weight of 2 grams, for Mk. III head. Like the Mk. I this is damped with viscous fluid.

135/9 21/9

Mk. I arm suitable for Mk. I and Mk. II heads and 78 r.p.m. and L.P. mono heads. Tracking weight  $3\frac{1}{2}$  grams.

90/6 14/6

**DECCA RESTYLED  
PROFESSIONAL ARM**

The Restyled Professional Arm, when used in conjunction with the ffs Mk. III head, creates a combination unrivalled throughout the world for quality of sound reproduction. This unique arm possesses many outstanding features. They are both coarse and fine counterweight adjustments for achieving perfect dynamic balance. An additional sliding weight in conjunction with an accurately calibrated scale allows for adjustment of stylus pressure to suit all the heads in the ffs range.

A lowering device is incorporated, and a degree of bias compensation is another feature of the design. The pick-up leads are brought out to a pin socket at the base of the pillar. This allows for ease of installation and overcomes the danger of added torsional forces caused by twisted pick-up leads.

This completely supersedes original Professional Arm at no difference in price.

Transcription Arm only. 90/6 14/6

**DECCA ANTI-RUMBLE  
INTEGRATED PICK-UP**

In the Decca Deram ARI pick-up the mechanical combination of arm and head has been arranged to effect directionally selective filtering which almost eliminates the most troublesome rumble frequencies without reducing any required low frequency signal. The great advantages of this purely mechanical system operating at the point of excitation as opposed to more complex devices built into the amplifiers, are not only its extreme simplicity, but also the fact that wanted and unwanted modulations even of the same frequency are mechanically separated and the unwanted filtered while the wanted remain unimpaired. The Deram ARI pick-up arm is fitted with the transcription stereo pick-up head suitable for all stereo records and the majority of mono L.P.'s, E.P.'s, and 45 r.p.m. singles. The arm will also accept the mono L.P. and 78 r.p.m. Deram heads. Playing weight is factory pre-set at 3.5 grams, but this may be adjusted if necessary by altering the setting of the counterweight. Dimensions: Overall length 10.3". Distance from centre of turntable pin to axis of rotation of pick-up base 8". Height adjustment range. Height can be varied over a range of 3".

See page 116 for matching transformer.		

**ORTOFON SMG212 PICK-UP ARM**

Due to the special shape of the arm, turntable leveling is unnecessary. The turntable may be up to 30° out of level before tracking difficulties arise. Ball bearings are applied for both horizontal and vertical motions, assuring trouble-free performance even at the lowest possible stylus forces. Designed for the type G Shell. No other type of shell will fit into it. All ORTOFON Cartridges can be mounted into the G shell. Furthermore, this shell is designed to take standard cartridges of other makes. Height over mounting plate adjustable.

**S.M.E. PRECISION PICK-UP ARM**

Compensation is provided for the force which tries to move a pick-up arm towards the centre of a record. The arm is given an opposing bias, adjustable for various tracking pressures, which balances the stylus centrally in the groove so that it does not favour one wall. Precision ball races and knife-edge bearings reduce pivot friction to approximately .020 grammes

measured at the stylus. Cartridges can be used at optimum stylus pressure without the excess weight otherwise required to overcome friction in the pivots.

A carefully chosen offset minimises distortion due to tracking error. The balance system permits accurate longitudinal and lateral balance of cartridges from 7-20 grams weight and tracking pressures from  $\frac{1}{2}$  to 5 grams applied precisely without the need for a stylus pressure gauge.

Full advantage can be taken of the best present and future cartridges, impracticable with arms of "integrated" design.

Lever operated raising and lowering control gives automatic slow descent. Fascinating to use—safeguards valuable records.

Choice of tone arm length to suit space available. If the motor board is big enough the 3012 is better, tracking error is even smaller and for studio use 16" records can be played. Otherwise the 3009 can be used with every confidence and indeed is the one most frequently employed.

TONE ARM BTD-12S**

The tone arm that perfectly matches the performance of Thorens turntables. Taking into account the exhaustive experiments made by professional users, the BTD-12 S arm has been designed to suit the need of the discriminating music lover for a precise, secure, easy to use and rugged instrument.

Specially adapted to receive pick-up cartridges of the highest lateral and vertical compliance, the realisation of the lowest possible inertia, both in the horizontal and vertical plane, has been considered as one of the first objectives.

Precision ball bearings throughout, simultaneous longitudinal and lateral balance, stylus force realised by means of a spring device exerting a torque on the horizontal shaft and precisely adjustable through a knob calibrated in grams, a convenient integrated arm control for lowering and raising the pick-up, are some of the main features of the BTD-12 S tone arm.

Evidence of utmost engineering precision and finely finished work appears here as on each Thorens turntable.

A few minutes and a screwdriver only are necessary to mount a factory pre-adjusted BTD-12 S arm on a THORENS TD 124 turntable.

## PICK-UPS AND UNIT ACCESSORIES

### THE ACOS STYLUS PRESSURE GAUGE

The new ACOS stylus pressure gauge enables you to check the downward force on your stylus in an instant, and keeps your equipment in first-rate condition, thereby protecting your records.

The ACOS stylus pressure gauge is constructed of channel-section nickel-plated brass and is graduated from 0-15 grams. It is of robust construction and folds up to protect the spring when not in use.

Retail Price 9/6 plus Tax 1/7

### GARRARD SPG3 STYLUS PRESSURE GAUGE

**FEATURES.** Elegantly styled—Modern design—Pleasing appearance. Easily readable scale, visible through a clear plastic window, reading 0-12 grams, with  $\frac{1}{2}$  gramme indications. Utmost sensitivity and accuracy. Accurate through the entire scale, 0-12 grams. Easy to operate. Readily adjustable. Plastic Scale Pan—no damage to delicate stylus. Swivelling Balance Lever to ensure sensitivity with all pick-ups. Will accommodate all current Pick-up Arms and Heads. Measures the exact Stylus Pressure at the actual stylus and at record level. Supplied complete with a 5 gram checking weight.

Retail Price 15/3 plus Tax 2/6

### GOLDRING STYLUS PRESSURE BALANCE

A small, simple and accurate balance which does not rely on springs. The stylus tip rests in an indentation at one end, and a sliding weight, moving along a scale graduated from 4 to 10 grams indicates stylus pressure. An inexpensive "must" for all gramophone users.

Retail Price 3/6 plus Purchase Tax 7d.

## PICK-UPS AND UNIT ACCESSORIES

### LENCO STYLUS PRESSURE BALANCE STB2

As illustrated. A simple but accurate balance graduated 0-5 grams.

Retail Price 12/6  
plus Purchase Tax 2/1

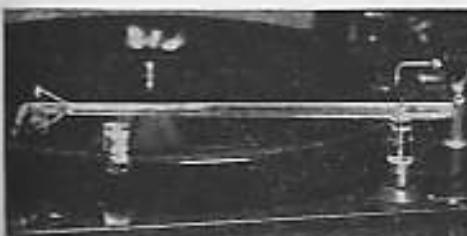

### DECCA STYLUS CLEANER

This new product is soundly constructed and incorporates a wheel covered in soft hair which engages with the stylus when the pick-up is in its rest position. A height adjustment screw means that the Cleaner can be accommodated to suit any pick-up on the market and the wheel is easily turned in one direction only by means of a single device.

The Cleaner helps to preserve your records and keep your sapphire or diamond stylus in excellent condition—indeed, it is a "must" for all discerning and conscientious record collectors.

*Note:*—For use with all non-automatic record players.

Retail 18/- Plus Tax 3/-

### THE "DUST BUG"

Easily fitted to any turntable and will remove dust and static from the grooves of a record at the moment of playing. A device which has already sold in many thousands and is to be highly recommended.

Retail 17/6 plus Tax 2/11

SPARE PLUSH PADS List 9d.

SPARE NYLON BRISTLES List 1/-

SPARE BOTTLES OF CLEANING FLUID List 1/6

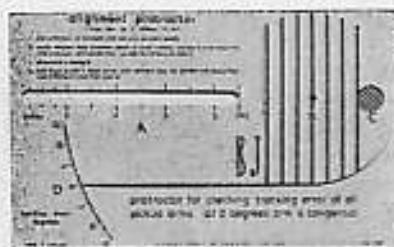

### AUTO CHANGER "DUST BUG"

As above but specially designed for fitting to Pick-up Arms on Auto-Change units.

Retail 17/6 plus Tax 2/11

## PICK-UPS AND UNIT ACCESSORIES

### B.J. PICK-UP ALIGNMENT PROJECTOR

Produced in plastic ivorine instantly measures the tracking accuracy of all pick-up assemblies, thus allowing the mounting position to be checked.

Retail Price 7/-

### PHILIPS CENTURY STYLUS TESTER

New developments in the design of pick-ups used for both monaural and stereophonic reproduction offer much improved performance to record enthusiasts. However, it is more important than ever that the adverse effect of stylus wear should not be allowed to offset advantages made possible by improved techniques. Regular stylus inspection is therefore essential. This remarkable new tester which features a built-in adjustable illumination system allows the stylus to be seen brilliantly lit, magnified a hundred-fold.

Retail price £10 10 0

### GOLDRING STYLUS MICROSCOPE

Stylus are easily positioned under the lens of the microscope by means of the rotating snap clip. Twin illumination is provided to offer maximum contrast and magnification is variable from 50 to 150 times, enough for even the smallest flaw or flat to be detected.

Retail Price £9 9 0

## LESS POPULAR TYPE STYLI

This section is introduced to help people as regards the identification of the more obscure types of styli. Such styli are mainly found in imported record players and radiograms, and in equipment used by visitors to this country. These styli are not readily available from the majority of dealers, due to the very limited demand, but dealers wishing to obtain same will be able to do so from the specialised wholesalers dealing in this range.
